

DATA SHEET

Quick Release Network Rail Approved Rip-Clip™ Hi-Vis Rucksack

Product Codes: P60026 Branded with Network Rail (made to order)

Quick release rucksack in tough 600D rip-stop polyester, featuring revolutionary patented Rip-Clip™ quick release system, allowing the rucksack to be safely released from the wearer with a pull of the chest strap, and a quickly and easily reassembled. Ideal for use in situations where there is a snagging risk, or in military and police operations where a rapid pack-dump is required.

The 3-part clip system replaces the old press stud and velcro versions which can become ineffective by being re-set incorrectly. Rip-Clip's design means that is simple and fool-proof to re-set. This clip system is currently used widely within the UK rail industry and on Network Rail. Developed in collaboration with Network Rail over 10 years ago, the Rip-Clip™ rucksack is the only approved rucksack for trackside use in the UK. An operator's guide comes complete with this rucksack.
