ELITE ALPHA LIGHT

SALES SPECIFICATION SHEET

The **Elite Alpha Rechargeable Light** produces up to 5000 lumens over a full 360 degree area using the latest LED technology.

The durable and robust injection moulded construction ensures the product can handle the harshest of working environments delivering crisp light providing a safe work site.

The light is fitted with a lithium iron phosphate (LiFePO4) rechargeable lithium battery allowing the unit to run at full power on both sides for 9hrs.

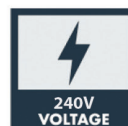

Using the latest technology in optical design the lenses ensure minimal light loses and ensure all the available light is directed exactly where required for maximum efficiency with minimum power, saving energy and running costs!

SPECIFICATIONS:

- ✓ Up to 5000 lumens output
- ✓ 9 hours on both sides runtime
- ✓ 3.5 hours recharge time
- ✓ Lithium iron phosphate 345Wh battery
- ✓ Latest LED technology
- ✓ TPR soft grip handle and shock absorbing base plates
- ✓ 5 amp fast charge function
- ✓ Battery level indicator and low warning user alert
- ✓ Robust design with glare free optical diffuser
- ✓ Multi directional friction tilt bracket allowing the head to be directed to where the light is required
- ✓ IP44 & IK08 rated
- ✓ Highly efficient 170 lumens per watt
