SOLEGUARDZ

# World's First Fully Encapsulated Puncture Resistant Insole

## SoleGUARDZ™

### Puncture Resistant Insoles

SoleGUARDZ™ Puncture Resistant Insoles are an exciting, innovative product offering both superior comfort and puncture resistance with a fully encapsulated, flexible Steel-Flex® steel midsole.

## COMFORT & CONVENIENCE

- | Made of extremely lightweight polyurethane (weighing little more than a regular insole)
- | Wear continuously or occasionally, as the need for extra protection arises
- | Can be used in place of existing insole in many types of non-safety footwear
- | Anti-microbial top cloth, containing AEGIS® technology, and deep heel cup with added arch support provide extra comfort
- | Helps alleviate discomfort related to hallux rigidus (turf toe) and hallux limitus

## SUPERIOR PROTECTION

- | Fully encapsulated, flexible steel midsole exceeds all international puncture-resistance standards
- | Use anywhere safety policy dictates that puncture-resistant footwear protection must be worn, such as
  - o in factories and workplaces,
  - o renovation and construction,
  - o metalworking,
  - o medical first response,
  - o sanitation and landfill,
  - o hunting and fishing
