

Product Specifications

Mindray AED Backpack

- **Durable AED Carry Case** – This backpack is designed to protect an AED from harm while on the go.
- **Clear Viewing Window** – There is a clear window on the front of the backpack to quickly see the AED inside and check the expiry date.
- **Easy to Transport** – The backpack features a comfortable grip handle and strap to make it easy to transport to the scene of an emergency.
- **Padded Interior** – For added protection, there is padding inside the backpack, softening any blows that may occur.
- **Dimensions:** 8cm x 29cm x 36cm (H x W x L)

The **Mindray AED Backpack** is designed for transporting a Mindray defibrillator from one point to another. It is ideal for emergency response teams in the workplace, as well as search and rescue teams that need to reach a casualty quickly. The ergonomic design and extra protection allow AEDs to be transported quickly and efficiently to the site of an emergency. The clear inspection window allows staff to check the AED status without removing the device. **Please Note:** The AED backpack is supplied empty; [AEDs//PA880] are available to purchase separately. **Key Benefits**

- **Easy to transport** – the backpack makes it easy to transport the AED between locations, ensuring that one device can cover multiple areas, rather than being permanently stationed in one place.
- **Faster emergency response** – having a backpack allows the AED to be taken directly to the casualty by staff, providing faster response times and increasing a casualty's chance of survival.
- **Clear window on the front of the bag** – allows members of staff to easily check on the defibrillator.
- **Additional storage space** – there is an additional pocket at the front of the backpack to provide storage for additional CPR supplies or replacement pads to ensure that essentials are always on hand.
- **Comfortable to carry** – it is ergonomically designed with an easy to grip handle and shoulder straps, allowing for quick and easy transportation.
- **Added AED protection** - The nylon fabric and extra padding inside the AED protects it from accidental bumps and knocks.
- **Provides peace of mind** – knowing there's an AED on site and easily transportable reduces anxiety among employees and customers, especially in organisations with older populations, visitors, or higher-risk environments.
- **Encourages a proactive safety culture** – having an AED on site demonstrates a business's consideration for the health and wellbeing of their staff and visitors.
- **Ideal for emergency response teams** – the portability and ergonomic design make this backpack ideal for emergency response teams both in and out of the workplace.

Why Have an AED in the Workplace? UK workplaces should have an AED (Automated External Defibrillator) because it significantly improves emergency response, demonstrates duty of care and supports a safer working environment. They are increasingly regarded as an essential part of the modern workplace, helping to save lives, supporting risk assessments and clearly demonstrating an employer's commitment to health and safety. **Product Specifications** Dimensions: 8cm x 29cm x 36cm (H x W x L) Suitable locations: Both indoor and outdoor use, but not for outdoor storage. Material: Nylon **Ideal For**

- Search and rescue teams
- Mobile responders
- Large workplaces
- Security teams
- Event venues
- Universities
