## SDA 3 TAKmats

D3305

Super Dust Absorbent Medium Size

## DESCRIPTION

Constructed with 36 resin impregnated woven cotton layers within a heavy-duty plastic frame, SDA TAKmats have a cushioned foam base that allows the tacky layers to penetrate all types of footwear soles to remove the heaviest soiling.

The step on step off design contains all foot borne contamination preventing it from being carried into a controlled area. As the layer becomes saturated with soiling it can be simply peeled away to reveal a new clean layer.

SDA mats are essential within paint shops, construction, offshore, nuclear, electronic industries and many other applications.

## FEATURES & BENEFITS

- SDA Mats are free standing, multi-layered floor mats which are a highly effective method of preventing footborne contamination from entering or leaving protected zones.
- Each of the 36 layers is coated with a non-transferable resin mounted on a foam base which ensures that any loose particles on the surface and within the tread of the footwear are detached and remain in the resin on the mat.
- The resin used in SDA Mats has a high absorbency for maximum soil retention which prevents the spread of contamination.
- Layers are only required to be removed when soiled, as the layer becomes saturated with dirt and soil it can be simply peeled away and disposed of to reveal a new clean layer.

## STORAGE

Store in a dry place at ambient temperatures.

ORAPI ® cannot be expected to know all applications in which its products are used or their conditions of use. ORAPI ® shall not be held responsible: for the suitability of its products for a given use or specific purpose, for the methods of application over which it has no control. The information contained in this technical data sheet can on no account be a substitute for the preliminary tests which are essential and which must be carried out in order to check the suitability of the product to each intended application. CLEAN

# TECHNICAL DATA SHEET

## DIRECTIONS FOR USE

Remove protective packaging and place on surface.

Users should simply step-on and then step-off.

Once the surface becomes saturated with dirt and soil, simply peel away the layer to reveal a new clean layer.

## HEALTH & SAFETY

Refer to Material Safety Data Sheet for further information.

## PACKAGING

**Pack size:** D3305-2X1 (2 mats) 61 x 91cm
