## *Anti-viral door push pad*

# Safe Pad - Anti-viral

## Key facts

**.Anti-viral pad with permanent resistance to covid 19**

## Safe pad :

*.Successfully tested against covid 19*

*Block London's revolutionary coating has been clinically tested to greatly increase the resistance of any surface to the spread of covid 19.*

## *.Antimicrobial Coating*

*The antimicrobial coating contains silver ions, which safely inhibits microbial growth. Slow release of the silver active ions provides long-term antimicrobial protection.*

## *.Long lasting - Anti viral properties*

*The safe pad has 2 year anti viral properties, this should not be considered a replacement for regular cleaning but it will greatly reduce the infection rate in problem areas such as public push door zones.*

Complies with: **Resistant to Coronavirus (ISO 21702:2019)**

## Complies with

**Complies with: Resistant to Coronavirus (ISO 21702:2019)**

## Build up

- 1: Anti covid coating
- 2: Push plate
- 3: Self adhesive backing
