ENTER THE WORLD OF HIGH PERFORMANCE

Kermel A90 consists of 99% meta-aramid & 1% antistatic. The Vulcan A90 is Eagle's entry level fire suit which provides many features you would expect to see in a premium product. There is no compromise in terms of safety or quality to meet the new higher standard EN469:2020.

VULCAN A90 - No Compromise

- excellent colour fastness (wash & light fastness)
- no pilling: permanently looks good
- optimal wearing comfort
- above average dimensional stability - even after frequent washing
- permanent flame retardancy, non-melting, non dripping
- no breaking of the fabric after contact with flame
- no afterburning & afterglow after removing the flame
