Product Features and Benefits

3 layers softshell

Lightness and protection from cold, wind and fine rain

Decorative retro-reflective piping on the front and back

Removable sleeves

Use all year round

Water-repellent and breathable fabric  
WP: 8000  
Mvp : 3000

Increased comfort of use due to better breathability

Softshells are developed to meet everyday use throughout the year whether worn in the first or second layer.

Today it is unavoidable, the softshell is THE technical clothing that can be used all year round.

Light, flexible, wind-proof it is a true ally for everyday life.

When temperatures are mild it is an excellent garment to protect from the wind, cold and light rain.

And when it's colder, we recommend using the softshell as a 2nd layer under a parka.

Laurent Kostrzewa, Body Protection Product Expert

Softshells are jackets that derive their name from the textile that make them up and whose performance differs according to the textiles used.

The presence of a membrane makes the textile a wind-breaker, it is then composed of 3 textile layers :

- external very often stretch
- the membrane
- the inner side very often polar for the comfort and the contribution of heat.

Composed of 2 textile layers with no membrane, it is a real technical alternative to the polar with its appearance and its water repellent properties.

The Softshell jacket can be used as a 2nd or 3rd layer. Wind-proof, water repellent,

insulating with or without a hood, with or without sleeves, this is real everyday clothing.
