

## Beta Climbing Telescopic Reach Pole

### Beta Climbing Access Reach Pole

The Beta climbing Access reach pole can be used either to facilitate a reach rescue (remotely clipping a rescue system to a casualty who is out of reach, such as someone falling from a structure and are hanging from the lanyard/s). They can also be used for clipping Carabiners to out of reach anchors.

### Key features

- 1 mm extruded aluminum pole sections
- Channeled pole sections reduce flex and twist
- Double internal pole collar for added stiffness
- External pole section locking mechanism
- Rubberized vinyl end cap
- Six section to the poles terminating at 15mm section
- 2.7 mm stainless steel gate trap
- Nylon 6 orange head

Designed specifically for use with EN 362 triple locking/double action and captive eye carabiners

### LONG

Extends to 542cm.  
Compresses to 100cm.  
Weight 0.82kg

Code BT-542
