CERTIFICATION

ISO 20471:2013 High-Visibility Clothing is an international standard which specifies requirements for high visibility clothing capable of visually signalling the user's presence.

High visibility clothing is grouped into three classes related to risk assessment. The classes are determined by three different minimum areas of retroreflective, fluorescent and/ or combined performance material.
A class three garment offers the highest degree of visibility.

Users should select the required class of performance based on a risk assessment of the location/situation.
