CONCRETE PLACER

TECHNICAL SPECIFICATIONS

A strong, lightweight aluminium concrete placer designed for levelling and spreading concrete on footings, foundations and sub bases.

BENEFITS

- **Welded heavy-duty aluminium braces for extra strength**
- **Optimal curve to easily push and pull material while spreading and levelling concrete**
- **1530mm handle provides extended reach for improved control across the slab**
- **508x105mm blade**

HOW IT WORKS

TECHNICAL DATA

SKU	**DAP501**
Weight	1.2kg
Dimensions	L1530mm x W508mm
Material	Aluminium
Finish	Powder Coated
Suitable For	Self-compacting concrete, tarmac, asphalt & loose materials
Box Qty	tbc
Pallet Qty	tbc

IMPORTANT INFORMATION:

- Rinse with water between jobs to remove any built up concrete & chemicals before they set.
- Wet concrete is caustic and can cause skin irritation or burns. Avoid direct skin contact and wash thoroughly after exposure.

Wear appropriate PPE & avoid skin contact with wet concrete

Store flat or upright in a secure area
