Deep-set gripping surface to prevent slipping.

Spring-loaded gate closure system.

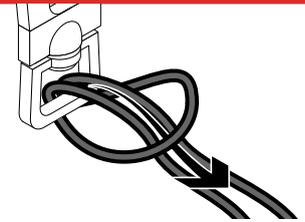

Strong, proven design.

SPECIFICATIONS

SKU	MAX LOAD	MAX TETHER LENGTH
H10031	7 kg 15 lb	1.3 m 51 in

HOW TO USE

1

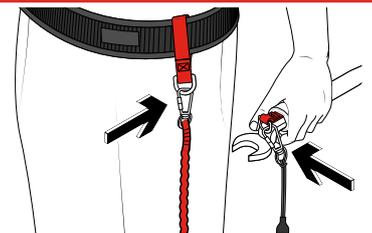

Connect a GRIPPS tool tether with a loop ending, (e.g. H01073) by passing the loop end of tether through the enclosed bottom hole of carabiner. Weave the tether back through it's own loop to create a choke-hold. Pull tight to secure.

2

To attach the carabiner to a tool connector or anchor point, twist the carabiner lock in a counterclockwise direction to unlock.

3

Your carabiner is now ready for use with your selected tether. Remember, to not exceed max load of carabiner.
