## Thermal Waterproof Winter Cut-Resistant Glove — Level E

### Extreme Protection. Uncompromising Performance.

Very comfortable acrylic cotton yellow liner with a double-dipped orange grip rubber coating.

The gloves are super warm; they will keep your hands warm in winter while you continue performing your chores in open spaces. The fluffy liner can keep you warm at -25 °C.

The rubber coating is applied over the liner, effectively isolating the hand from the latex. This prevents any contact with the skin and the material.

The foam latex provides a good, strong grip when handling wet or dry products.

Crafted for professionals who demand excellence in every condition, this glove combines advanced protection with refined cold-weather engineering.

A fully sealed waterproof membrane forms an impenetrable barrier against snow, ice, and driving rain, while a premium thermal lining delivers enveloping warmth without bulk. Even in sub-zero conditions, hands remain agile, comfortable, and ready for precision work.

The high-tensile, cut-resistant shell achieves EN388 Cut Level E, offering elite defence against sharp edges, metal, and abrasive materials. A premium grip coating enhances control on wet, oily, or frozen surfaces, ensuring confident handling of tools and materials in the most unforgiving environments.

Every detail is designed with intention—from the ergonomic contouring that reduces fatigue to the flexible construction that moves naturally with the hand. This is winter protection elevated: durable, sophisticated, and built for those who operate at the highest level.

## Recommended Applications

- **Construction & infrastructure**
- **Utilities & maintenance**
- **Metal fabrication & handling**
- **Transportation & logistics**
- **Outdoor industrial work**
- **Waste & recycling operations**

This product is available in sizes 7, 8, 9, 10, and 11.

**Washing Instructions:** Washing not recommended.

**Packing** Gloves are available in bags of 6 pairs and cartons of 72 pairs

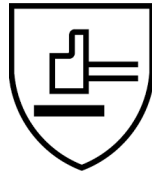

## Performance Features

- **Maintains flexibility in low temperatures**
- **Ergonomic fit reduces hand fatigue**
- **Warmth without excessive bulk**
- **Reliable grip in wet, snowy, or frozen conditions**
