CHAMF

TECHNICAL

Robust, zinc plated steel 110mm PVC pipe chamfer tool. Used correctly Chamf will provide hundreds of uses and applies an industry standard 15° pipe chamfer in a few seconds. The unit works with power drills by mounting the male spigot into the drill chuck. Use as guided by the directional arrows on the unit. Chamfer blades are not replaceable.

CHAMF.....Instructions for use

Mount Chamf securely into the drill chuck. Clamp the pipe to be chamfered and then place the end of the tool over the end of the pipe, ensuring it is kept parallel to the pipe and apply steady pressure whilst engaging the power drill. Never force the tool. Ensure all loose items of clothing are secured and hands are kept away from the rotating unit

MISSION STATEMENT

'Innovation for Construction' is the heartbeat of **METEX**
We design and supply the Construction Industry with ingenious, high quality and effective products saving both time and money on site.
