Product Specifications

One Person First Aid Kit with Eye Wash

- **Compact Design** – This compact first aid kit is easy to transport due, making it ideal for use on the go or in locations where space might be an issue.
- **Water-Resistant Nylon Bag** – The nylon fabric bag is water-resistant preventing water damage or contamination of the sterile first aid supplies.
- **Essential First Aid Supplies** – Contains essential supplies for providing first aid in an emergency.
- **Includes HypaClens Sterile Eye Wash Pods** – Ideal for irrigating an eye after it has come into contact with a contaminant.
- **Dimensions:** 14cm x 5.8cm x 11.5cm (L x W x H)
- **Ideal For:** Vehicles, home offices and lone workers.

The **One Person First Aid Kit with Eye Wash** is the ideal solution for those in low-risk environments, for example while working remotely or travelling. The size of the kit allows it to easily fit into a glove compartment, while the strap allows it to hang from a wrist or belt loop for easy transportation. An upgrade to the One-Person First Aid Kit (K3004), this first aid pouch includes eye wash, allowing the user to treat eye injuries as well as other minor injuries and abrasions. **Key Benefits**

- **Compact design (14cm x 5.8cm x 11.5cm)** – perfect for small spaces or transporting the first aid kit from various locations. The compact is ideal for those who are on-the-go a lot or need a small kit that will fit in tight size constraints.
- **Made from a water-resistant nylon** – the pouch is made from nylon, which is water-resistant, ensuring that first aid supplies are protected during showers should the emergency occur outside. The bag also offers some protection to the supplies from general wear and tear as well as dust.
- **Contains essential first aid supplies** – the kit provides essential first aid supplies for treatment at the scene of an emergency. There are supplies to protect, clean and cover the wound until further medical attention can be received, as well as sterile eye wash to properly clean out an eye.
- **Clear labelling** – The case is a recognisable green and features clear white text stating it is a first aid kit with eye wash, as well as a bold white cross symbol for quick and easy recognition.
- **Allows for self-treatment on the go** – for those who are often working alone, having a small supply of first aid equipment as well as a guidance leaflet on hand will allow them to carry out first aid, when necessary, without having to seek assistance.
- **Suitable for different situations** – this one-person kit can be used for a variety of low-risk situations, whether in the workplace, at home or while on the move.
- **Wrist strap** – a nylon strap is attached to the pouch making it even easier to transport, whether looping a belt through it or hooking the strap around your wrist as you carry it to the site of the accident.

Kit Contents:

- **1 x Guidance Leaflet** – provides common protocols in an emergency situation.
- **1 x Vinyl Gloves (Pair)** – limits the risk of cross-contamination during treatment.
- **1 x Triangular Bandage** – a versatile first aid supply, primarily used for immobilising injured limbs.
- **20 x Washproof Plasters** – ideal for wound dressing and protection.
- **6 x Safety Pins** – perfect for holding dressings in place on a wound.
- **1 x Large Sterile Dressing, 18 x 18cm** – protects the wound from contaminants.
- **2 x Sterile Moist Wipes, 10 x 12cm** – perfect for use as a cleansing aid for minor cuts and grazes.
- **2 x HypaClens Sterile Eye Wash Pods, 20ml** – suitable for irrigating an eye after it has come into contact with irritants.
