

Debris-Guard

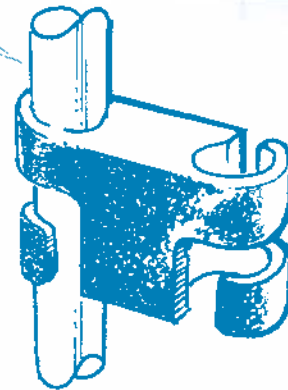

- ◉ Reduces risk of damage from flying debris.
- ◉ Welded tubular steel frame requires no assembly or ongoing maintenance.
- ◉ Durable 2-ply close-knit PVC mesh catches debris, whilst allowing wind to blow through.
- ◉ Superior Grade RA2 reflective panels ensure product can be used on or alongside the road. Double-sided for extended product life.
- ◉ Uni-directional, variable height hinges ensure stability on uneven ground & enable each 3-sided section to be joined together.
- ◉ Anti-trip stabiliser feet available for in-line deployment & additional stability on solid ground.
- ◉ Each pallet contains 18 cartons, each carton contains one fully assembled 3-sided barrier.

Corporate logos can be incorporated (MOQs apply).

Tubular steel frame is powder coated in red. Other colours are available to special order.

Polypropylene hinges uni-directional and enable easy addition of further sides if required.

Superior Grade reflective panels. Quilted construction (arrow-cell) for maximum durability.
