

DATA SHEET

Quick Release Rip-Clip™ Hi-Viz Field Backpack Product Code OTS-04

At 41Ltr this is a larger version of the Network Rail approved quick-release rucksack. Suitable to fit hard hat or bulkier items including clothing. Featuring revolutionary patented Rip-Clip™ release system, allowing the backpack to be safely released from the wearer with a pull on the chest strap, quickly and easily reassembled. Ideal for use where entanglement risks, or in military and police operations where a rapid release is required.

The 3-part clip system replaces the old press stud release system which can rapidly become ineffective through use and were dangerously easy to re-set incorrectly. The Rip-Clip™ design has a safe and fool-proof re-set mechanism. Rip-Clip™ system is widely used within the UK rail industry in the UK and now in the USA. An operator's guide comes complete with the backpack.

- **Size: One Size 41Ltr**
- 600D hi-vis orange material meets RIS-3279-TOM (GO/RT) + EN20471
