

FIRECHIEF® HOT WORKS WELDING BLANKETS - MEDIUM DUTY

FIRECHIEF®
making the world a safer place

VERMICULITE
COATED
GLASS FIBRE

MODEL:

FWBM101

FWBM102

FWBM202

FWBM203

FWBMR25 (ROLL)

- Dual-sided vermiculite coated glass fibre material
- Withstands moderate welding and variable heat levels
- Perfect for industrial brazing and welding applications
- Temperature resistance up to 850°C
- Robust material with superior tensile strength
- Hemmed with high-performance Kevlar thread
- Blankets contain eyelets
- Re-usable storage bag included

FIRECHIEF® HOT WORKS WELDING BLANKETS - MEDIUM DUTY

FIRECHIEF®
making the world a safer place

The all-new range of welding blankets from Firechief® Global are designed for easy specification, based on the application.

From light-duty blankets, ideal for protecting against sparks from welding, to our heavy-duty blankets, which are performance-rated up to 1000°C, we've designed a compact, easy-to-navigate range to cover all applications.

TEXTILE CONSTRUCTION

Material	Glass Fibre
Coating	Vermiculite (dual sided)
Colour	Yellow/brown
Weight g/m2	1150
Thickness (mm)	1.3mm
Warp/Weft Density (thread/cm):	6.5x4+0.5
Weave	Plain
Tensile Strength Warp: N/25mm Weft: N/25mm	≥1200 x 1200
