# DESIGNED FOR SAFETY

## STYLE 600 RANGE

### SAFETY AND COMFORT

- CE Certification to EN397, including optional approvals for lateral deformation, molten metal splash, electrical insulation (440 Volts a.c.) and -30° centigrade – Style 600 is designed for use in a wide variety of applications.
- VDE Certification for electrical insulation to 1000 Volts a.c. – Style 600 is ideal for use by electricians throughout Europe.
- A well balanced, lightweight shell with a new eight point terylene head-harness and a deep nape strap design – Style 600 ensures high wearer acceptance through comfort, stability and performance.
- An easy to adjust headgear for head sizes 50 to 66cm – Style 600 fits the widest range of head sizes for optimal safety and comfort.
- The unique Protector airflow option moulded into the helmet shell – Style 600 allows air to flow over the head, minimising heat build up and improving wearer comfort.

### COLOUR OPTIONS

Style 600 is available in nine standard colours with special colours produced to order.

### BRANDING OPPORTUNITIES AND CORPORATE IDENTITY

- Distinctive modern styling – Style 600 projects a high quality modern company image.
- Manufactured from durable ABS plastic – Style 600 will retain a high quality company identity throughout its life.
- Six different branding positions – Style 600 offers the widest choice of corporate identity options.

### A COMPREHENSIVE RANGE OF ACCESSORIES

- Leather sweatbands – Alternative to the standard terrytowel material.
- Ratchet hand-wheel adjustable headgear – For multiple wearers and greater helmet stability.
- Two and four-point chinstraps – To increase helmet stability in arduous environments. Ensures a good seal with the helmet whilst minimising interference with hearing protection.
- Lamp Bracket and Cable Clip – Style 600 can be used in low light.
- An optional retractable eye shield – Operates within the helmet shell to give eye protection to EN166.

### COMPATIBILITY WITH OTHER PROTECTIVE EQUIPMENT

- A unique scalloped headband design at the sides of the helmet shell – Ensures good compatibility with earmuffs and consistent earmuff performance.
- The helmet accessory slot is compatible with 25mm and 30mm attachments – The Style 600 is designed to accept a wide range of earmuffs.
- Specially designed visor carriers have been developed – Ensures a good seal with the helmet whilst minimising interference with hearing protection.
