Features & Benefits:

We have been through an era when wellington type safety boots have been predominantly produced by injection moulding polyurethane and pvc, both fossil fuel derivatives. Buckbootz **BBZ 7000 Yulex®** takes Mother Nature right back to the forefront of waterproof safety footwear technology with a hand built boot made from real rubber compound which is bonded to deforestation free Yulex® foam rubber. Yulex® is the world's first natural plant based replacement for neoprene and geoprene and it performs to the equivalent standard or better than both. The boot outsole is also rubber and the non-metallic safety toecap and anti-penetration Nail Stop midsole, the washable insole and the breathable aerospenser lining are all Global Recycle Standard (GRS) certified. Rubber is a natural and renewable resource. Buying exceptional safety wellies and helping to save the planet is now within your grasp.
