Iris II Safety Helmet and Visor

Oil & Gas Industry Favourite • Integral Retractable Visor • Tough ABS Shell

PRODUCT DESCRIPTION

The Iris II Safety helmet is an industry favourite and is renowned in the Oil & Gas industry. Featuring a retractable, integral drop-down polycarbonate visor, the Iris 2 protects your eyes from splashes of dangerous fuels, liquids and other substances and is rated to EN166 Class 1F courtesy of a unique visor that allows you to lower the visor from it's position inside the helmet to an optimum position to protect your eyes.

The Iris 2 Helmet has a robust design, and with a tough, EN397 certified ABS shell, the Iris II offers you the highest levels of protection in the workplace. The visor adjustment ensures a very close and comfortable fit around the eye and nose considerably reducing the possibility of any fuel or chemical splash bypassing the visor.

The Iris 2 has a comfortable textile webbing cradle to support the helmet on the head and has a removable adjustable headband with nape strap. The adjustable ratchet ensures a perfect fit, making the helmet easy to wear, even for long periods of time. The comfort is enhanced by the provision of adjustable air vents in the crown to avoid build-up of perspiration.

FEATURES & BENEFITS
