## KEY TECHNOLOGIES

### STRETCHDRY WATERPROOF TECHNOLOGY

Our Stretchdry technology enables us to produce a product which has a hydrophilic membrane, but unlike anything else on the market, we also incorporate a huge amount of stretch, making this product, waterproof, breathable, windproof and incredibly comfortable.

### TOUCHSCREEN

This glove now includes our touchscreen friendly tabs on the thumb and index finger, to enable you to take calls, take photos and check your bearings all without having to take your glove off and expose your hand to the biting cold or rain. Endure the elements and defy the outdoors whatever the weather.

### MERINO WOOL

Merino wool is a wicking fibre which has the ability to absorb and release moisture to cool or warm, regulating temperature. Can absorb and release 10 times more moisture than synthetics. Merino has excellent anti-microbial properties, helping to reduce odour build-up.
