

INSTRUCTION GUIDELINES

COLOURS AVAILABLE

The Shark Safety Knife is a 'moulded' version of the 9mm Big Fish Safety Knife, with extra features including a spring loaded hook blade which can be set to auto or manual retraction and 'opposing slopes' at the blade exit for a more efficient cut.

Also available 'without' hook blade.

Clothing

Stretch / Shrink / Bubble Wrap

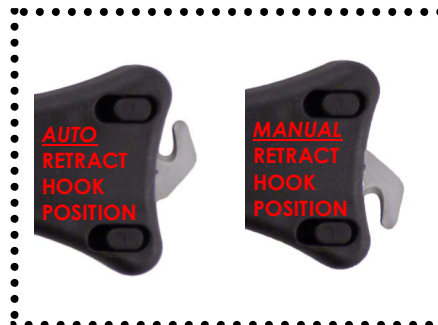

Rope (up to 12mm)

Strapping / Banding / Cable Ties

Tape & Card

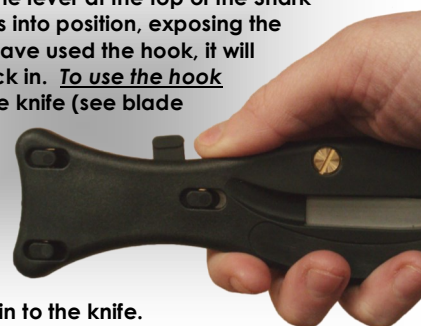

BLADE CHANGE

Remove locking screw & slide the top half of the knife back until you can lift it off. Reverse or replace blade(s) with care. Replace top half of the knife & slide back into place. Replace locking screw.

THE RETRACTABLE HOOK BLADE

Use your thumb to push the lever at the top of the Shark knife forward until it clicks into position, exposing the hook blade. Once you have used the hook, it will automatically retract back in. To use the hook blade manually, open the knife (see blade change) and reverse the hook blade so it points down. Push the lever forward until it clicks as before, once you have finished cutting, flick the lever up with your thumb to retract the hook back in to the knife.

Replacement blades & nylon holster available
