

TECHNICAL DATA SHEET

83100/83200 PU RAIN JACKET

DOUBLE STORM FLAP

CONCEALED FOLDAWAY HOOD

BREATHABLE PU COATING

2 BANDS AND 2 BRACES OF TAPE

WATERPROOF TAPED SEAMS

DESCRIPTION

Blackrock's Hi-Vis PU Rain Jacket is tailored to keep you safe, seen and dry in all weather conditions. It features a PU coated polyester outer shell, with waterproof taped seams and a concealed foldaway hood, together with storm flaps on the main zip, cuff and pockets to keep the elements at bay, plus 2 bands and 2 braces of reflective tape giving Class 3 visibility. The jacket also includes 2 large outer cargo pockets and a zip pocket concealed via a storm flap which helps keep items and documents dry.

SIZES

S - 6XL

MATERIALS

100% PU coated polyester

WASH CYCLE

5 washes

TAPE

High-Reflective
5cm Poly Tape

KEY FEATURES

- Breathable PU coated polyester fabric
- Concealed foldaway hood
- Double storm flap on main zip, cuff and pockets
- 2 bands and 2 braces of reflective tape
- 2 large outer cargo pockets

STANDARDS

- (Yellow) EN20471 Class 3 & EN343 3:1
- (Orange) EN20471 Class 3 RIS-3279-TOM & EN343 3:1

TECHNICAL DATA SHEET

CERTIFICATION

ISO 20471:2013 High-Visibility Clothing is an international standard which specifies requirements for high visibility clothing capable of visually signalling the user's presence.

High visibility clothing is grouped into three classes related to risk assessment. The classes are determined by three different minimum areas of retroreflective, fluorescent and/ or combined performance material.
A class three garment offers the highest degree of visibility.

Users should select the required class of performance based on a risk assessment of the location/situation.

Class water penetration = 1-3

Class water vapour resistance = 1-3

Protective clothing certified according to EN 343 protects against precipitation from rain or snow, fog and ground humidity. The garment fabric and seams are tested and classified on a scale of 1 to 3 (where 3 is the maximum) for water resistance, which forms the top number of the rating, and water vapour resistivity (ie. breathability), which forms the bottom number of the rating.
