SCREED BAR WITH LEVEL

TECHNICAL SPECIFICATIONS

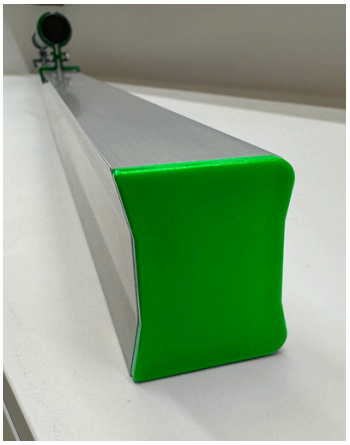

Aluminium tamper beam with bubble level. 2000mm wide, ideal for finishing concrete & liquid screed. Colour may vary.

BENEFITS

- **Spirit level in the handle allows you to screed and level in the same stroke**
- **Lightweight aluminium with easy to clean finish**
- **Reversible clamped handle**
- **Rounded edge for floating, sharp edge for cutting**

HOW IT WORKS

Use the screed bar to strike off, level, and compact freshly laid concrete or screed by moving it across the surface in a sawing motion. Use the sharp edge for cutting and levelling material, then rotate the bar to the rounded edge to float and smooth the surface, using the integrated bubble level to help achieve an even finish.

TECHNICAL DATA

SKU	**DAP505**
Weight	2.3kg
Length	2000mm
Bar Height	50mm, with handle 110mm
Material	Aluminium
Handle	Detachable & Reversible
Applications	Concrete
Pallet Qty	tbc

IMPORTANT INFORMATION:

- Clean the tool after use to prevent material build-up and maintain performance.
- Ensure the tool is in good condition before use and maintain a clear, safe working area at all times.

Wear appropriate PPE & avoid skin contact with wet concrete

Check for damage before use
