AMTECH PLASTERER STARTER KIT

Build your skills. Get ready for the job.

Get started with a practical selection of Amtech tools for plastering and preparation. Ideal for apprentices and those building their first toolkit, this selection brings together a plastering trowel, aluminium hawk, bucket and margin trowels, and an internal corner trowel, with a polyurethane float for rendering work. A scraper and wall brush support preparation and clean-up, while the heavy-duty tool bag keeps hand tools together between jobs.

11 selected items. One of each product or set included.

26L tub and 16L bucket supplied alongside the tool bag.

KIT COMPONENTS

G0325

180mm (7") Bucket trowel with soft grip

G0675

100mm (4") Scraper with soft grip handle
