POWERED AIR PURIFYING RESPIRATOR TH3 | VERSION 1 & 2

Article number: F15.1.003 | Article number: F15.1.004

Highest filtration efficiency up to 99.999 %.

Lightweight and compact design for a wide field of visibility.

High-performance (welding) shield.

8 hours

Lightweight Li-ion battery – up to 8 hour duration.

High airflow up to 210l/min.

With **99.999 % filter efficiency**, our high-performance TH3 filter offers first-class respiratory protection - even under the most demanding conditions. The **ergonomic belt loop system** ensures optimum wearing comfort even during long periods of use. The class **1 F K N visor in accordance with EN166** provides reliable protection against mechanical and chemical influences. With a powerful **Li-Ion battery for up to 8 hours of continuous operation** and a variable **flow rate up to 210-266 liters per minute**, this system is the ideal companion for professional use. Whether in construction, welding, woodworking, the automotive industry, agriculture, DIY or mining - this system is used wherever safety comes first.

PAPR VERSION 1

- Folding forehead protector
- Visor with high scratch and damage resistance and wide field of vision

Technical Details

Dimensions
Helmet: 323mm x 223mm x 175mm

Weight
Mask body: 700 g

PAPR VERSION 2

- Folding forehead protector
- Combination visor with welding protection to EN175 B & EN379 1/1/1/1

Technical Details

Dimensions
Helmet: 323mm x 223mm x 195mm

Weight
Mask body: 750 g
