

Evolution LifeVac and First Aid Point, British Standard Compliant

Product Specifications

- **Life Saving Device:** Combines a British Standard compliant kit with an advanced anti-choking device.
- **Regulated Medical Device** – CE marked, UKCA marked, MHRA regulated and MDR compliant
- **Addresses A Known Risk** - Provides a life-saving solution for choking emergencies that traditional kits don't cover.
- **Highly Visible Wall Mounted Station** – Ensures supplies can be found quickly in an emergency with clear signage and photoluminescent headers.
- **Ideal for** offices, shops, hospitality, care homes and schools.

The **Evolution LifeVac and First Aid Point** is a comprehensive safety solution designed to support workplaces in managing both routine first-aid requirements and choking emergencies. By combining essential first-aid equipment with a dedicated choking response device, it ensures immediate access to critical resources in emergency situations. Designed in-line with British Standards and regulated by the MHRA, the unit provides reassurance that the equipment meets recognised regulatory and quality requirements. Suitable for a wide range of workplace environments, the Evolution LifeVac and First Aid Point supports effective emergency response and helps organisations meet the high standard of health and safety preparedness.

Choking Response Kit

- **Includes both a LifeVac anti-choking device and a British Standard Compliant first aid kit** – provides solutions to support in the event of workplace injuries or choking incidents.

- **Proven life-saving equipment** – LifeVac has helped save more than 5,000 lives from choking incidents.
- **Interlocking, quick release brackets** – wall-mountable, interlocking brackets not only allow your kits to be immediately visible and easily accessible but also allow you to customise and reconfigure your first aid point to suit the space available should you add additional kits.
- **Photoluminescent headers and bracket labels** – improve visibility and readiness by ensuring first aid points remain easy to locate in low-light conditions and by helping staff quickly identify and replace any missing kits.
- **Includes a regulated medical device** – CE marked, UKCA marked, MHRA regulated and MDR compliant for peace of mind.
- **Enables swift intervention during critical incidents** – the LifeVac allows rapid action in choking emergencies, while the first aid kit provides essential supplies for cuts, burns, sprains, and other common injuries, helping to minimise complications.
- **Promotes employee confidence and peace of mind** – knowing that both everyday first aid and life-saving choking devices are readily available helps staff feel secure, empowered, and prepared to act in an emergency.
- **Cost-effective risk management solution** – this combination offers an affordable way to protect employees, visitors, and customers, while reducing potential legal claims and reputational damage.
- **Suitable for all UK workplaces** – ideal for offices, schools, restaurants, care homes, retail environments, and industrial sites where food is served, physical activity occurs, or injuries are possible, providing versatile safety coverage.

Why Businesses Should Have a LifeVac Device on Their Premises Choking is a leading cause of accidental death, especially among children and adults over 65. Brain damage can occur within six minutes of oxygen loss, and death can follow in under ten, while ambulance response times average eight minutes. Having a LifeVac as well as a first aid kit on site provides vital protection for staff and visitors in the event of a choking emergency, whether caused by food, medication or small objects. **Kit Contents** First Aid Kit
