FIRECHIEF® FLAT-PACK WHEELED SITE STANDS

A smarter way to get site safety in place

Getting safety equipment on to a busy site quickly is rarely straightforward. The Firechief® Flat-Pack Wheeled Site Stand removes the usual obstacles.

It ships flat. At 24 units per pallet versus 3 for a standard assembled stand, the cost and carbon saving is significant, for the distributor, the installer, and the end customer. On site, it assembles in only 8 minutes without tools. Once up, it provides a solid, mobile base for fire extinguishers, alarms, signage and other safety kit, keeping everything visible and accessible wherever work is underway.

The modular panel design makes it straightforward to configure for the task at hand. Add or remove sections, mount Firechief® cabinets and accessories using the pre-cut fixing points, or use the laser-cut slotted display panel to attach signage and alarms. A complete site safety station at a fraction of the typical delivery cost and in a fraction of the time.

Three variants. One system. Clear on site.

Available in three colour-coded configurations for straightforward organisation and instant identification across any site.

Red: Fire Point (FPSSR)

The standard fire safety configuration. Mount up to three fire extinguishers, alarms and signage. Compatible with a wide range of Firechief® products. Ideal for construction sites and temporary fire points.

Green: First Aid Point (FPSSG)

Clearly identified first aid station for on-site emergency response. Suitable for first aid kits, cabinets and emergency equipment. Provides a visible, dedicated first aid station wherever the workforce is.

Yellow: Spill Response Point (FPSSY)

Designated spill control station for environmental safety and compliance. Suitable for spill kits, absorbents and containment equipment. Helps sites maintain compliance with safety and environmental standards.

Works with the Firechief® range

Designed to work alongside the wider Firechief® product range, including:

- Up to three fire extinguishers
- Double Extinguisher Cabinets (HS72, HS72K, FCDC92 and FCDC92K)
- Rotary Hand Bell (RHB)
- Sitewarden RF Pro (FSP500)
- Howler Alert Alarm (HSA1)
- Sitewarden Call Point Alarm (SP100)
- Various fire safety signs
