Full-Body Harness with Front & Back D-Rings and Quick-Release Hardware – EN 361

- Full body harness designed for reliable, EN-compliant fall arrest protection in everyday industrial work environments.
- Lightweight ergonomic design with breathable shoulder and back padding helps reduce fatigue during prolonged use.
- Specially formulated webbing flexes with the body to support freedom of movement and secure load distribution.
- Quick-release leg buckles and chest buckle allow fast, simple, and secure donning for daily use.
- Multiple adjustment points ensure a correct and comfortable fit across a wide range of body types.
- Dorsal fall arrest D-ring provides a compliant primary attachment point for fall protection systems.
- Visible stitch patterns and fall impact indicators support quick and reliable inspection procedures.
- Durable, water-repellent webbing enhances longevity in harsh jobsite conditions.
- Certified to EN 361 and rated for a maximum user capacity of 140 kg for industrial safety compliance.
