

AMTECH ELECTRICIAN STARTER KIT

Get organised for the next job

Bring your electrical hand tools together with this practical Amtech starter selection. VDE screwdrivers and VDE pliers sit alongside an automatic wire stripper with crimper, a mini cable cutter, saws, measuring tools and a compact torch. The 22-pocket contractor's tool bag provides a convenient home for the collection, making this a useful starting point for building an organised toolkit.

21 selected items. One of each product or set included.

VDE descriptions apply only to the products explicitly listed as VDE. Other tools in the kit are not described as insulated.

KIT COMPONENTS

A0100

16oz (450g) Claw hammer with steel shaft

B0651

160mm VDE combination plier

B0652

160mm VDE long nose plier
