BLACKROCK

TECHNICAL DATA SHEET

CF53
GRS ORIGIN
HIKER

DESCRIPTION

The Blackrock GRS Origin is a first-of-its-kind safety boot, made entirely from recycled materials from top to bottom. It features a GRS-certified nubuck leather upper, a recycled PU sole unit, and a fully waterproof recycled membrane to keep feet dry in all conditions. Lightweight, metal-free toe cap and midsole provide reliable protection, while the dual-density PU sole delivers shock absorption, slip resistance, anti-static properties, and fuel-oil resistance. Using innovative technology, the sole is manufactured from recycled PU pellets that are melted and injected to give old materials a new life—without compromising performance.

SIZES

UK 3-13

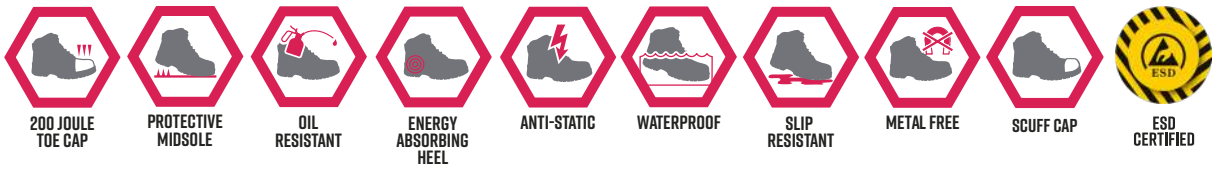

STANDARDS

EN20345:2022
S7S SC FO SR

KEY FEATURES

- Waterproof regenerated nubuck leather upper
- Lightweight metal-free toe cap and midsole
- BASF recycled dual density, shock absorbent, anti-slip, anti-static and fuel oil resistant PU sole
- Energy absorbing heel reduces foot fatigue
- ESD certified
- Scuff cap for added durability

FEATURE ICONS

TECHNICAL DATA SHEET

MATERIALS

- Waterproof regenerated nubuck leather upper
- BASF recycled PU sole unit

TYPICAL INDUSTRIES

- Engineering
- Highways
- Airport & logistics
- Rail
- Utilities
- Agriculture & landscaping
- Construction

CERTIFICATION/MARKINGS

EN ISO 20345:2022 is an internationally recognised standard which specifies requirements for safety footwear. Any product which references an EN standard must have the relevant certification attributed to the product code found on the product.

The product standard can be found on the tongue label and should match that stated on the certification. The standard is usually a group of numbers and letters, for example S3L FO SR. These letters and numbers denote the characteristics that make up the footwear you are buying which include properties such as protective toe cap, waterproof uppers, protective midsole, fuel oil resistance, anti-static, heat resistance and slip resistance.

Users are advised to select the required class of performance based on the risk assessment of the location and/or task as appropriate.
