PRODUCT INFORMATION

Experience unmatched dexterity, safety, and comfort with the F22 Level E glove. Expertly designed to meet the highest standards of cut protection (EN 388:2016 - XX41E), this glove is made with advanced HPPE fibres and tungsten. It is an essential tool for professionals who require maximum protection and dexterity. The F22 glove combines premium Level E cut resistance with an ergonomic design that ensures hand agility and comfort, even in the most demanding work environments.

These gloves not only protect the palms and fingers from cuts and abrasions but also help maintain the pristine appearance of the items they handle by preventing fingerprints.

Not only do these gloves provide robust protection against cuts and abrasions on the palms and fingers, but they also keep the items you handle looking immaculate by preventing unsightly fingerprints. Equip yourself with gloves. that truly redefines safety and performance in your work.

COMMON APPLICATIONS

- *Use it as a cut-resistant glove under a disposable glove.
- *Cut, slice, and chop a variety of foods efficiently.
- *Safely clean and change slicer blades in deli and supermarket settings.
- *Pluck and peel with precision and skill.
- *Work effectively with foil and metal.

Storage

To keep your glove in top condition for over ten years, follow these tips:

- * Avoid very hot surfaces.
- * Limit exposure to ultraviolet rays.

These simple steps will help ensure durability and quality.

Washing Instructions:

Washing is not recommended because the mechanical risk tests were performed using new, unwashed gloves.
