Small Flexi-Tray with container grid

Shallow flexible tray with grid deck, ideal for use as a contained dispensing or mixing area. The Flexi-Tray contains any leaks and spills and the grid keeps containers clear of any spilled liquids. Tray can be used without grid as a drip tray. Made from rubberised plastic the tray is lightweight and tough, the sidewalls reform after being trodden-on or crushed. Low profile design is ideal for sliding under plant and machinery or any situations where leaks and drips occur. Flexi-Tray can be lined with absorbent material to absorb liquids on contact to make emptying the tray easier and cleaner. Manufactured in Britain Low CO₂
