## SF107 REDWOOD BROWN BOOT

AVAILABLE IN  
TWO COLOURS

PROTECTIVE  
STEEL TOE CAP

WATER RESISTANT  
LEATHER UPPER

PADDED COLLAR

KICKPLATE  
HEEL

PROTECTIVE  
STEEL MIDSOLE

### DESCRIPTION

Blackrock's Redwood boot has a water resistant leather upper to keep feet dry, plus a padded collar for ankle support. It has both steel toe cap and midsole protection with a scuff cap for added durability and kick plate on the heel for easy removal. Its hardwearing, dual density PU sole is shock absorbent, anti-slip, anti-static and fuel oil resistant, plus a ladder grip sole unit with a transverse profile that gives added stability when climbing or descending ladders.

### SIZES

UK 3-13

### STANDARDS

EN20345:2022  
S3 FO LG SR

### KEY FEATURES

- Water resistant leather upper with padded ankle
- Steel toe cap and midsole
- Scuff cap for added durability
- Heel kickplate for easy removal
- Dual density shock absorbent, anti-slip, anti-static and fuel oil resistant PU sole
- Energy absorbing heel reduces foot fatigue
- Ladder grip sole unit gives added stability

### FEATURE ICONS

# TECHNICAL DATA SHEET

## MATERIALS

- Water resistant leather upper
- PU/PU sole
- Steel toe cap
- Steel midsole

## TYPICAL INDUSTRIES

- Automotive
- Uniform
- Engineering
- Security
- Agriculture & landscaping
- Transport
- Warehousing

## CERTIFICATION/MARKINGS

EN ISO 20345:2022 is an internationally recognised standard which specifies requirements for safety footwear. Any product which references an EN standard must have the relevant certification attributed to the product code found on the product.

The product standard can be found on the tongue label and should match that stated on the certification. The standard is usually a group of numbers and letters, for example S3L HRO SR. These letters and numbers denote the characteristics that make up the footwear you are buying which include properties such as protective toe cap, water-resistant uppers, protective midsole, fuel oil resistance, anti-static, heat resistance and slip resistance.

Users are advised to select the required class of performance based on the risk assessment of the location and/or task as appropriate.
