Way4Now Rubber Wheel Chock – 10 Tonnes

Model: SHU-D-10TH-TY

The Way4Now rubber wheel chock is a heavy-duty vehicle restraint solution designed to secure parked vehicles and prevent unintended movement. Built from high-strength rubber, it delivers excellent grip, durability, and weather resistance, making it suitable for industrial, commercial, and transport environments.

Technical Specifications

1. Material: Industrial rubber
2. Load rating: Up to 10 tonnes
3. Colour: High-visibility yellow
4. Application: Vehicle restraint/wheel stabilisation
5. Environment: Industrial, logistics, commercial yards

Key Features

1. Heavy-duty construction rated up to 10 tonnes.
2. High-friction rubber for secure tyre grip.
3. Bright yellow finish for high visibility
4. Weather and impact resistant
5. Suitable for indoor and outdoor use
6. Ergonomic shape for easy positioning

Applications

- 1 Warehouses
- 2 Loading bays
- 3 Fleet depots
- 4 Commercial vehicles
- 5 Industrial facilities

Benefits

- Reduces risk of vehicle movement
- Improves workplace safety
- Durable long-term performance
- Minimal maintenance required
