

IMPACTO® METGUARD

The METGUARD METATARSAL PROTECTOR is a safety footwear attachment which protects the metatarsal area of the foot. Designed and tested to compliment steel cap footwear. The lip of the METGUARD™ sits on top of the steel cap at load point and is secured with existing laces or optional straps. It helps protect the workers' upper foot by deflecting and dispersing the impact of falling loads. The METGUARD fits all safety shoes and boots. It is a perfect economical solution for visitors, temporary workers, clerical, sales people or when there's requirement for metatarsal protection.

- Made of extremely durable, lightweight, non-conductive polycarbonate
- Used with existing footwear, transferable between users and shoes
- Attaches with your shoe laces or optional straps for non-lace up footwear
- The METGUARD is practical, comfortable, easy to fit and simple to use
- Meets minimum impact resistance 75 lbs as specified in ASTM F2413/F2412 (ANSI Z41)
- Part #METGUARD - Sold per pair (Case of 20 pr 12x8x9 inch, 6 lbs.)
- Part #METSTRAP - Sold separately for non-lace up footwear. Resilient nylon webbing weaves through plastic ladder lock providing secure fastening to adjust to different types of footwear. Set of 4, 1" wide x 24" long.

Suitable for use in all workplaces and industries including Mining, Construction, Utilities, Manufacturing, Transport, Storage, Forestry, Retail trade & Warehousing

Our new display strip will allow you to display the Metguard easily and prominently on existing store racks for customers to view
