

ETF20TKV-PV

PARTICLE BLOCKING

Eagle FR's only air permeable particulate barrier hood with 99.9% to 0.1 micron blocking efficiency.

Eagle FR have always been regarded as the market leader in firefighting hoods, serving the needs of firefighters across the world.

After extensive trials with leading brigades we have developed a new concept which protects against dangerous cancer causing particles. We have successfully passed over 200 wash cycles and maintain superior performance with no change in shape.

Composition:

Outer: Kermel® Viscose 1:1 Rib 220gsm

Liner: Stedair Prevent-Tri Laminate 150gsm

***Also available in styles:
ETF20, ETF6 & ETF8*

Product Features

- Superior particulate blocking performance.
- Eagle FR PREVENT blocks 99.9%(0.1 MICRON) of particulates after 200 wash/dry cycles.
- Highly air permeable, superb durability & unmatched breathability
- Innovative design to ensure that the seams are comfortable
- Elasticated face opening.
- Designed to work alongside other PPE.
- The fabrics are designed in a rib design for additional comfort and stretch using a warp knitted fabric for superior fit and comfort.

Protect Against Contaminants

200x 

This garment has been tested 200 x Wash/Dries & continues to perform
