## HF8R WORK HEAD TORCH 1600LM

Hard work that requires two hands, especially work in the dark, just got easier with the Ledlenser HF8R Work headlamp.

This headlamp is ideal for working in the low-light over extended periods of time. The patent-pending Adaptive Light Beam Technology provides automatic dimming and focusing so you never need to break your workflow or concentration to adjust your light.

It's the first Ledlenser headlamp which automatically adapts to your needs and requires no manual control at all. With your hands free, you can focus on the task at hand while the HF8R Work delivers the perfect lighting every time.

It is extremely robust, waterproof, and comes with protective elements at the front.

You will also have a high colour rendering index for close-range work, and an additional red front light. There are various options to mount the HF8R Work headlamp on your hardhat. The mounting system is included. You can easily charge the integrated battery via Magnetic Charge System - even during operation. Now you are ready to get to work!

You always have the option to control the headlamp yourself via the convenient Focus Wheel to activate the Digital Advanced Focus System. It will transition virtually seamlessly from homogeneous floodlight to focused spotlight, providing the perfect light pattern for any range and work application. You can also remotely control and personalize the settings on the HF8R Signature via Ledlenser Connect App to your specific illumination needs.

- Dims and automatically focuses thanks to our patent-pending Adaptive Light Beam Technology; hands-free use.
- Powerful headlamp with red front light and innovative Digital Advanced Focus System
- Extremely powerful battery
- Protective elements at the front; suitable for continuous immersion in water (IP68)
- Extensive scope of supply for various mounting options and applications
- Supplied with Comfort Pad, connect adapter, Helmet connecting kit, Magnetic charging cable (USB-C), Mounting material, Wall Mount
