## STRIKER BRUSHES

### Description

This sturdy, trade quality 100% synthetic bristle striker brush has a head in the distinctive round striker shape for high capacity paint holding. The head is set at an angle for optimum contact with the surface and a long handle that gives an extended reach, enabling awkward areas like high walls and ceilings or behind gutters and pipes to be reached without having to resort to ladders or platforms. It is ideal for applying water- and solvent-based paints including emulsion and masonry paints to smooth or textured surfaces, and woodstains and varnishes to fences, sheds and other timber surfaces.
