FRESNO BROOM KIT

TECHNICAL SPECIFICATIONS

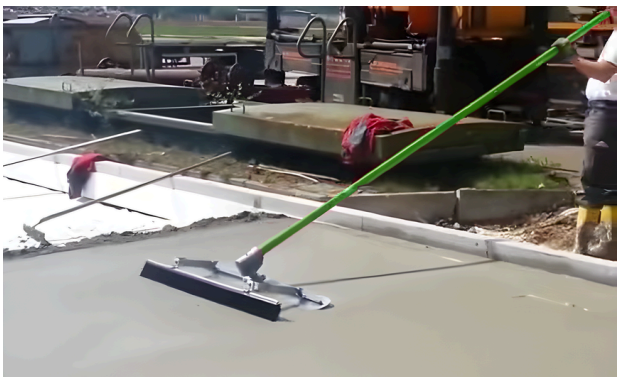

Manganese steel round end trowel blade with Fresno broom. Available as a kit with adjustable bull float bracket & swaged handle.

BENEFITS

- **Lightweight & durable construction for reduced fatigue on large pours**
- **Used for smoothing concrete and creating fine texture**
- **Provides a controlled, even texture**
- **Ideal for driveways, pavements, and industrial floors**

HOW IT WORKS

Use the Fresno broom after bull floating, once the concrete has begun to firm up, to create a uniform brushed finish. Pull the broom evenly across the surface using the swaged handle, maintaining consistent pressure to produce straight, slip-resistant texture lines.
